

Sweet Household Electric Under Blanket

Usages:

1. Promote the blood circulation so you won't be afraid of chill in warm winter.
2. Helpful to people who are feeble, not apt to sleep, and have icy hands and feet.
3. Installed under a bedcover, it won't affect the all-ness of installation inside a room.
4. The sweet heating bed pad is the best choice for children to be filial to their parents.

Features:

1. Heating promptly: It takes only few minutes to adjust to 39°C.
2. Power-saving. The power consumed at the maximum temperature is US\$0.06/hour.
3. Clean and facilitative: The device can be put in warm water to brush and clean lightly.
4. Built in with an auto temperature protector, the temperature won't exceed the normal with good stability.
5. Safe and with safeguard. Meet the standard parts prescribed by UL of America.

Specifications:

- ◆ Temperature controller: a variable micro-adjusting switch.
- ◆ Safety device: When the temperature exceeds the normal, it will automatically cut off.
